

According to K-LOVE's web page, you are considering changing the FM stations available. Please don't. I listen to K-LOVE at work and in my car and consider it a very encouraging, uplifting station in the music and short speeches it airs. I think it fills a need in this day and age, and I would miss being able to listen to it if you take it away. When you changed the rules about networks on our satellite TV, we ended up choosing not to have any because our local stations aren't as good.
